Crizal® Sapphire™ HR

* Stack order for demonstration only

(1) External laboratory tests and internal technical tests – 2020. Compared to the competitor most known lens-brands by consumers (2019 external brand tracking in 11 countries). The word 'overall' refers to anti-reflective coatings important criteria, ranked through an external quantitative consumer study – 2019.

(2) Number of layers for illustration purpose.

(3) E-SPF® is an index rating the overall UV protection of a lens. E-SPF® was developed by Essilor International and endorsed by third party experts. The E-SPF® index relates to lens performance only and excludes direct eye exposure that depends on external factors (wearer's morphology, frame shape, position of wear). *Except for Orma®: E-SPF® 10 index.

High-Resistance
Technology™

SUPER HYDROPHOBIC

For smudge resistance and a superior ability to repel dirt and water.

ANTI-STATIC

Embedded in the AR multi-layers to repel dust and keep lenses cleaner longer.

AN EMBEDDED NANOLAYER

A multi-angular (α) criterion that quantifies the overall anti-reflective efficiency (0° - 45°) to reduce reflections whatever the light direction (front and back sides of the lens)

INNOVATIVE RECIPE

A combination of four specific oxides known for their resistance against dust, scratches and temperature.

E-SPF® INDEX

Crizal coatings offer the most comprehensive daily protection against the invisible and often irreversible dangers of UV reflection in a clear lens.⁽³⁾
